# Design Logo, Icons & Landing Website & Database

We are pleased to present this proposal for providing custom photos and icons and landing page for your business tailored to your specific requirements. Our goal is to create visually appealing and functional designs that enhance your brand identity and user experience. Below are the terms and conditions for our services:

## Services Offered:

### Custom Photos:

- We will provide up to three (3) sample photos based on your requirements.
- Each sample will be uniquely designed to match your specifications and brand aesthetics.

### Custom Icons:

- We will provide up to three (3) sample icons that reflect the style and functionality you require.
- Each icon will be tailored to meet your design and usability criteria.

### Landing Page Design

- Design and development of a landing website with the following pages:
- Home Page, About Page, Contact Page, Services Page
- Privacy Policy Page
- Terms & Conditions Page
- Responsive design to ensure optimal viewing on all devices (desktop, tablet, and mobile).
- Integration of provided content and basic SEO optimization.

# Design Logo, Icons & Landing Website & Database

## Process:

### 1. Initial Consultation:

- Detailed discussion to understand your requirements, preferences, and objectives.
- Collection of any existing branding materials for reference.

### 2. Sample Delivery:

- Delivery of three (3) sample photos and/or icons within the agreed timeframe.
- Each sample will include variations to provide you with a range of options.

### 3. Feedback and Revision:

- Opportunity to review and provide feedback on the samples.
  - One round of minor revisions included at no additional cost.
- 

# Design Logo, Icons & Landing Website & Database

## Database

This proposal outlines the design and implementation of a database system capable of supporting 100,000 active users, 100 GB file storage, and an 8 GB database. The system will emphasize robust security, including encryption at various layers.

### 1. Requirements:

- User Capacity: 100,000 active users
- File Storage: 100 GB
- Database Size: 8 GB
- Security: Multi-layer security with encryption

### 2. Security Implementation:

- Network Security
  - Database Security
  - Authentication and Authorization
  - Application Security
-
